

13+ Computer Based Assessment

During the 13+ assessment there will be an element of testing using computers. The test asks questions based on English, maths, and non-verbal reasoning, which includes multiple choice, drag and drop and complete the word answers.

The content is the same as required for the written English and maths papers.

This innovative test provides a reliable, fair, and comprehensive assessment for children whatever their educational background.

The test is deliberately designed to be taken without any prior practice.
